

16 September 2025

Dear students

allow me to send you information about the organization of lectures and practical trainings of the subject **Principles of Critical and Emergency Care**.

Lectures

The lectures are organized in a standard face to face form and at the same time you will find out lectures in electronic form in Moodle in the Anesthesiology section / Principles of Critical Care, where all lectures are available with recorded comments. Participation on lectures is part of classification, so it is obligatory to attend them.

Practical trainings

Practical trainings are important part of this subject. To make the teaching efficient, detailed theoretical knowledge of information provided during lectures is required. Therefore, we ask you to refresh your knowledge of information presented in the lectures before the practical trainings.

The practical trainings are held in the SimCenter of the Medical Faculty (main building, opposite to Dean's office).

Credit

All students must have at least 80% attendance.

Should you have any question contact, please, our office (e-mail: klara.plasilova@fnhk.cz).

Sincerely

Petr Čáka, M.D.
